The Horse’s Voice: How Trainers and Riders Make the Horse’s Needs Relevant in Dressage Training

EAAP 2016, Belfast, UK

Charlotte Lundgren PhD, Senior Lecturer
Dept. of Communication and Culture
Linköping University, Sweden
Developing Dressage Didactics

Departure points

*Applied linguistics:* Multimodal interaction analyses based on a dialogical understanding of communication

*Equestrian research:* Human-horse interaction depends on practical knowledge rather than theory

General aim

To describe and analyse the practical, tacit knowledge of dressage trainers, including teaching strategies, thus making this knowledge available for reflection and development

Aim of this substudy

To reveal how equine welfare is made relevant by trainers and riders during trainings
Developing Dressage Didactics

Participants

• 5 established trainers
• 15 experienced riders
• 15 Swedish warmblood horses

Data

• 750 min videotaped training sessions
• 400 min semi-structured interviews
• Field notes from the 5 yards

5 trainers working with 3 equipages each in one-to-one sessions

All data types used for analyses in this substudy
Developing Dressage Didactics

Horses contribute to the ongoing interaction e.g. by complying with or exhibiting resistance against demands from the rider.

However, the unfolding responses from trainer and rider are dependent on how they to interpret the horse’s behaviour.

This interpretation decides what is an appropriate response to the behaviour.

NB! Example made up!

Working canter exercise.
Example: Trainer making Horse’s needs relevant

Extract Id R4:14.50. 20 min into the training. Equipage has been working for canter pirouettes for some time.

Results

• Trainers and riders do make the horses’ behaviour relevant and treat it as reflecting the horses’ cognitive, emotional and physiological needs

• Trainers and riders accept the responsibility to meet these needs, even when they collide with for instance the goals set up by the rider

• The needs of the horses are used as resources both to explain problems and argue for specific solutions to them

• Trainers use the voice of the horse as a didactical device to guide the riders’ understanding of the unfolding interaction

What does this mean?

➢ Equine welfare is at it’s core an ethics-in-practice, emerging in the local, contextualised interaction between horse, rider and trainer.

➢ It is reasonable to claim that such ethics-in-practice differ between various contexts, and that they over time sediment into rather stable practices.

➢ A locally emerging ethics-in-practice does not automatically correlate with our encoded ethics, such as it is expressed for instance in the FEI rules.
“Developing Dressage Didactics: Interaction between Horse, Rider and Trainer” is funded by Linköping University, The Swedish-Norwegian Fund for Equine Research and The Swedish Centre for Sports Science.

FEI Dressage Rules

“The FEI requires all those involved in international equestrian sport to adhere to the FEI Code of Conduct and to acknowledge and accept that at all times the welfare of the Horse must be paramount. Welfare of the Horse must never be subordinated to competitive or commercial influences. The following points must be particularly adhered to:

General welfare:

(…)

b) Training methods

Horses must only undergo training that matches their physical capabilities and level of maturity for their respective disciplines. They must not be subjected to methods which are abusive or cause fear.”
